.NET Assignment Vertigo Games 2024

Description:

You are tasked with creating a simple console-based shopping cart application in C#.

The application should allow the user to add products to a shopping cart, view the contents of the shopping cart, remove items from the shopping cart, and calculate the total price of the products in the shopping cart.

Create a repository that we can access and commit regularly so we can follow your thought process.

Timeframe:

1-2 weeks depending on current obligations. If more time is needed please let us know so that we can come to an agreement.

Good Luck!
